andlinger center
for energy+the environment

The Andlinger Center for Energy and the Environment is issuing a request for proposals (RFP) for energy and environment related new equipment and capabilities for our shared facilities including the PRISM Imaging and Analysis Center and Micro NanoFabrication Lab (clean room) and the ACEE Ecohydrology, Environmental Fluid Dynamics, Energy Storage and Conversion, Organic Synthesis, Organic Clean Room, Photonics, and Solar Cells labs.

Consideration will be given to tools/instruments that will become a resource for the university community and should have a broad user base. The research performed on the instrument should be relevant to advancing knowledge in energy and environment, and if proposed for PRISM facilities, also in materials science.

Selected instruments will be purchased and managed centrally in the shared facilities.

For consideration under this request for proposals, please submit the following items electronically to acee@princeton.edu (attention: Jennifer Poacelli) by February 19, 2016.

- 3 page max project description
- Quote and information about additional costs including those associated with expected maintenance and consumable needs
- List of interested faculty and expected usage including realistic person-hour estimate for usage by group

Project description should include

- Description of the equipment and capability. Please address any existing, related capabilities/tools on campus and the need for an additional or upgraded tool.
- Description of the anticipated use in current and future research.
- Anticipated staffing/technical needs.
- Description of any special infrastructure requirements and installation requirements (power, temperature, vibration, etc.)

Project descriptions must indicate the importance of the tool toward advancing research in energy and/or environment.

Incomplete applications will be returned without consideration.

Andlinger Center for Energy and the Environment
Shared Equipment Request for Proposals

Please complete and submit this cover page along with (1) the proposal description, (2) a quote for purchase and other costs associated with the equipment, and (3) a list of interested faculty and expected usage including realistic person-hour estimate for usage by group and connection to energy and/or the environment.

Please submit these items as a single PDF document electronically to acee@princeton.edu by February 19, 2016.
